1856	37	48½	18½	25½	52	49	50	85½	S.W. and N.E.

1841 was remarkable for the most S.W. wind of any year; 1855 for N.E.; and 1849 for the most W.

We usually have from 35 to 52 days of N.E. and E. from January 1st to June 21st, annually, or a mean of 42 days.

Strongest gales occur while the wind veers in stormy weather from S.W. to N.W. February 6th, 1850, was the sharpest gale in above period.
